

# Bilr Enterprise

## An Expense Management Ecosystem

If you are processing bills and invoices for your organization, then Bilr Enterprise can help you drive meaningful revenue improvements.

# What is Bilr Enterprise?

By deploying Bilr Enterprise as an end-to-end expense management solution for your organization, you can easily review and analyze incoming invoices, ensuring compliance to agreed-upon terms and general best practices.

Drive meaningful revenue improvements through a reduction in, or removal of, the bill review process and its associated staff and tasks, as well as other connected tasks related to getting the invoices paid, maintaining in-depth analytics and insight into spend, and much more. With Bilr Enterprise, outdated tasks are automated with machine learning and techniques we've learn over a 15+ year period of having driven savings of \$1BN dollars for our clients.

Get an in-depth overview of your organizational spend through powerful and robust data analytics, delivered to you as a personalized Power BI report. Utilize these reports to inform business decisions such as vendor/supplier selection, and to find cost- and profit centres that shape your business' bottom line results.

**15+**

**Years of Experience**

**\$1BN**

**Client Savings**

## Why use Bilr Enterprise?

Lowering operational costs through the reduction or removal of the bill review process and associated workload will help to improve your profit margins. This is done through driving internal efficiencies and by removing redundant/manual processes, with the latest digital time recording and billing tool out there; Bilr.

It's simple, Bilr Enterprise digitizes all of your invoice data so that you never have to review a PDF invoice ever again. Get your vendors/suppliers to send invoice data directly through the Bilr billing software, or charge them a small added premium for you to accept outdated formats such as PDF. Eventually, for no cost to either party, all invoices will be wholly digital, giving you more insight than ever before while using a fraction of the time and money spent.

Beyond the Bilr Enterprise platform, invoice data created within Bilr or scanned from a PDF using our proprietary machine learning can be fed into your current accounts payable/financial systems via API or other secure transmittal methods. With an ecosystem-first mentality, Bilr Enterprise is interoperable and will work with your pre-existing collection of applications.

As Bilr Enterprise costs you nothing to implement with a zero-fee subscription, positive ROI is guaranteed for all of our clients. Easily implemented with a tried and tested step-by-step plan, Bilr Enterprise can reduce the required effort and cost for your organization's invoice receival, review, and payment process.

**Reduce costs, improve profit margins.**

## How does Bilr Enterprise work?

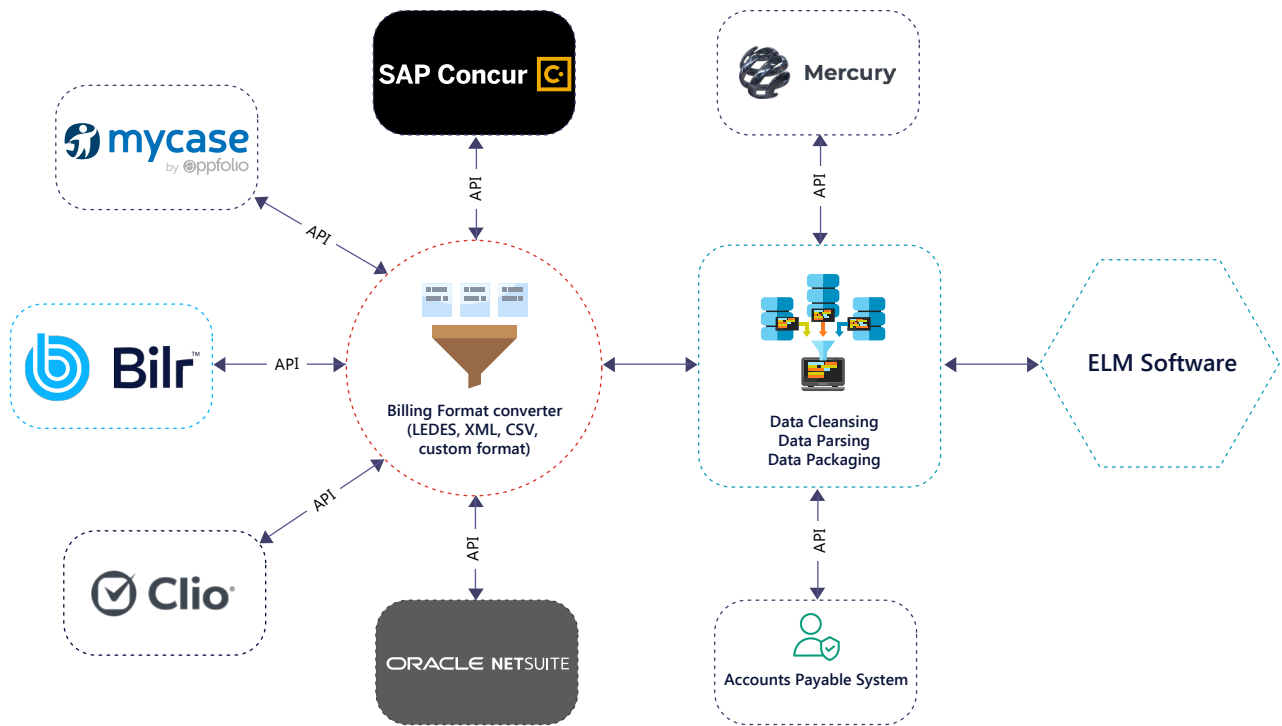

Bilr Enterprise has multiple aspects to it. As a standalone, it can work as a platform wherein you simply feed incoming invoice data into the application to process it, whether it'd be PDFs or other formats. Our expense management tool would then recognize the raw invoice data, inputting it into the application for further processing. At this stage, the data could be reviewed for billing guideline or SLA breaches through machine learning, or it could be plugged directly into your accounts payable/financial systems for payment, or other systems, all via API.

Taking it a step further, however; coupling Bilr Enterprise with our billing software, Bilr, we can start to see our expense management ecosystem taking shape. Onboard your vendors/suppliers at zero cost to them or you with the Bilr billing software. Using this software, your vendors/suppliers can send raw invoice data into clients' Bilr Enterprise workflow, ensuring billing compliance and the eradication of the human-manual bill review process for good.

Bilr Enterprise effectively digitizes the entire billing process from creation to receival, and lastly, processing and payment. If you're an invoice processor, Bilr Enterprise can increase your efficiency and speed with demonstrable financial benefit as a result.

Any business processing large amounts of invoices can benefit from Bilr Enterprise, stretching from restaurants to insurance companies and far beyond.

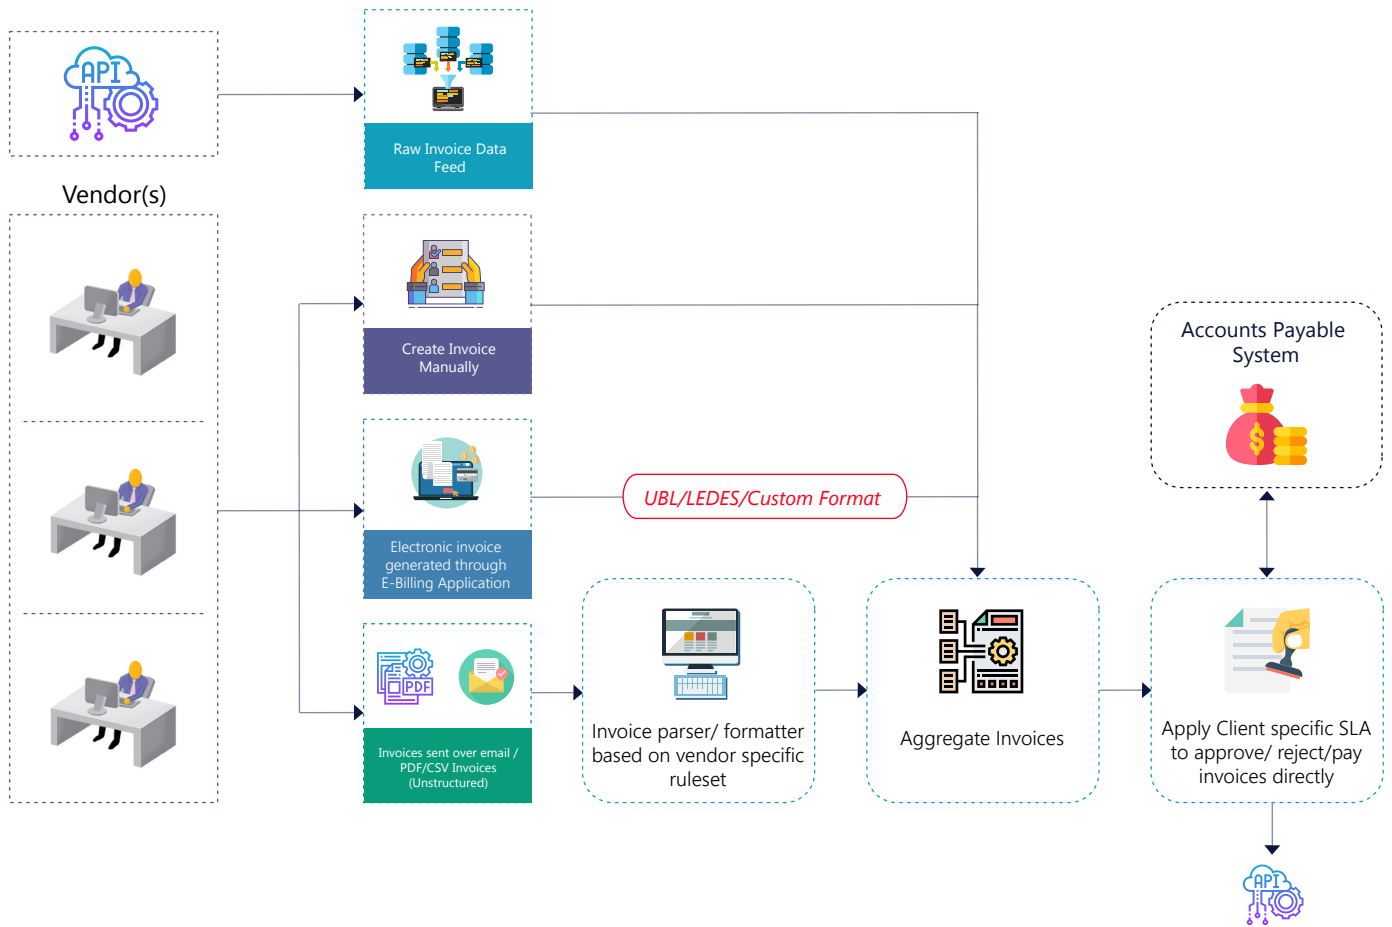

## Integrations:

## Main Benefits:

-  Zero cost to the client
-  Streamline and lower operational costs in processing vendor/supplier invoices
-  Collect valuable expense and billing data across multiple vendor/supplier categories
-  Digitize and automate outdated human-manual or redundant tasks
-  Reassign employees to more value-added tasks, or implement reduction in force
-  Place responsibility on vendors/ suppliers to provide electronic bills/invoice and supporting records
-  ROI delivered from month 1 of implementation
-  Enhance data analytics on expense management
